

COVID-19: Enhanced Energetics Remains Open

To: Customers, Vendors, Local & Federal Authorities

Location: Domestic and International

Regarding: Stay Home and Work Safe Orders

March 26, 2020

To Whom It May Concern,

As Stay Home and Work Safe orders are being issued by Governors and Judges across the United States, Enhanced Energetics has been identified as an “essential” business under Presidential Policy Directive 21 which outlines 16 business sectors deemed “Critical Infrastructure” by the Department of Homeland Security during these orders. Enhanced Energetics will continue to operate under our normal business hours. We have established required Center for Disease Control (“CDC”) protocols including social distancing and remote working for Enhanced Energetics employees where possible, always keeping the best interests of our employees and customers in mind.

As outlined in the state decrees, Essential Businesses and Operations must remain open and operational to ensure the continuity of commercial life during the COVID-19 crisis. As a supplier of products and services to the energy sector, Enhanced Energetics is an essential business recognized as necessary to remain operational during this crisis.

We will continue to provide updates to our customers as events evolve over the coming days and weeks ahead. Thank you for your patience and understanding during these unprecedented times.

Respectfully
